

A photograph of a white fireplace with a fire burning inside. Above the fireplace is a large, round, silver-colored clock with Roman numerals. On the mantel, there are decorative items including a small vase with reeds, a glass jar, and two white candle holders with candles. To the left of the fireplace is a white bookshelf with books, and to the right is a small round table with a glass jar. The background is a grey wall.

ELGIN & HALL

# Complete Collection

*Timeless Elegance, Captivating Warmth*

Finding your favourite fireplace has never been so easy

Responsible sourcing and manufacturing

High quality hand finished products

Designed and manufactured in the UK

## A Warm Welcome

### *To our new collection*

An Elgin & Hall fireplace could easily be the most rewarding addition you make to your home and its value. Since the foundation of our parent company in 1963, we have successfully continued to grow from our base in the North of England. Every design is lovingly created here in the UK.

Over 50 years of continuous innovation and development has provided us with a collection of fires and fireplaces to suit any interior and lifestyle, whilst always

adhering to our founding principles of elegance and simplicity.

This timeless quality means your chosen fireplace will always be comfortably in agreement with your tastes in furnishing and décor.

You can rest assured that our gas and electric fires are engineered, produced and tested for peak performance and reliability.

Our surrounds are designed to keep up with changing lifestyles and include features which only we can produce thanks to our investment in the latest machinery.

At the same time, we depend on our craft skills to hand finish and polish each marble or timber piece to perfection. It is this balance of innovation and heritage that makes your Elgin & Hall fireplace uniquely special.

48" Timara surround in White micro marble with Smartsense lights featuring a Exclusive gas fire (page 64) in Chrome

# An introduction to Micro Marble

## Surrounds

Possessing all of the charm and beauty of natural marble, micro marble offers a guaranteed even surface and strength to withstand wear and tear in the home.

Micro marble is a reconstituted mix of real marble pieces which are crushed and compacted together using resin to ensure a smooth surface finish.

This beautiful material has to be seen to be believed and to be fully appreciated first hand.

The craftsmanship we devote to producing fireplaces in our UK workshops is matched by innovation.

Our latest micro marble surrounds have clever touches and refinements pioneered by our in-house designers and technology. Another reason why your choice of an Elgin & Hall fireplace is anything but ordinary.

## Finishes

EEC: C

48" Timara surround in White and Grey micro marble with Smartsense lights featuring a 16" Chollerton Original electric fire (page 74) in Black Nickel.

## Timara

### *Surround*

Gentle hues of White and Grey micro marble are a true delight in the form of the Timara, beautifully offset by the traditional square profile and under mantel lighting. The slight frame of this 48" surround creates a chic centrepiece in any space.

Models:	42" & 48" Surround
Finish:	White & Grey or White micro marble
Hearth:	Standard Lipped, Bullnose* or Five-Sided*
Lights:	Optional
Rebate	45mm / 75mm

\* available on 48" surrounds only

50" Amorina surround in White micro marble with Smartsense lights featuring a Devotion Brantley gas fire in Chrome (page 65)

# Amorina

## *Surround*

This captivating creation owes its individuality to the classic credentials of the curved detailing. A tall, wide and handsome surround, the Amorina is equally charming in a traditional or contemporary setting; simply choose a fire to add the finishing touch.

Models:	50" Surround*
Finish:	Manila / White micro marble
Hearth:	Standard Lipped / Five Sided / Bullnose
Lights:	Optional
Rebate	45mm / 75mm

Available as an Amorina Deluxe electric fireplace (page 52)

## Odella Petite

54" Odella Petite surround in White micro marble with Smartsense lights featuring an Exclusive gas fire (page 64) in Brushed Steel

EEC: C

# Odella & Odella Petite

## *Inglenook & Surround*

The timeless style of the Odella is beautifully complimented by an inset gas fire radiating heat.

Also available as a striking inglenook with front and rear hearth; pairing perfectly with a gas or electric stove at its centre.

Our Odella Petite is the shorter sister (75mm lower). Perfect for a smaller room or lower ceiling.

Models:	54" Inglenook† or Surround*
Finish:	Grey / Manila / White micro marble
Hearth:	Standard Lipped
Lights:	Optional
Rebate	75mm

\*Back panel available with 22" cut out for installation with the Chollerton fires.

† Not suitable for solid fuel stoves

52" Eliana surround in Manila micro marble with Smartsense lights featuring a gas fire with Eclipsim fascia

EEC: C

# Eliana

## Surrounds

Here is simplicity with a curvaceous appeal. The delicately arching frame takes a slight step inwards before the gentle curved profile on all sides to create a bold structure unique to Elgin & Hall.

Models:	48" or 52"* Surround
Finish:	Grey / Manila / White micro marble
Hearth:	Standard Lipped / Five Sided / Bullnose
Lights:	Optional
Rebate	45mm / 75mm

\*Back panel available with 22" cut out for installation with the Chollerton fires.

Beautifully constructed

54" Verdena surround in White micro marble with Smartsense lights featuring an Exclusive gas fire (page 64) in Brushed Steel

EEC: C

# Verdena

## *Surround*

The Tudor Arch is an Elgin & Hall signature style that really sets this fireplace apart from its peers.

The arch is sculpted in a smooth, convex profile that gives the Verdena a contemporary twist.

Models:	48" or 54"* Surround
Finish:	Manila / White micro marble
Hearth:	Standard Lipped
Lights:	Optional
Rebate	45mm / 75mm

\*Back panel available with 22" cut out for installation with the Chollerton fires.

Available with Smartsense lighting

52" Siena surround in Pearl Stone micro marble with Smartsense lights featuring an Exclusive gas fire in Chrome

EEC: C

# Siena

---

## Surround

The classic quality of micro marble is perfectly expressed in this Renaissance design. The apparent simplicity of the Siena is discreetly offset by the fine fluting that defines the surround where it steps inwards in a concave curve.

Models:	48" or 52"* Surround
Finish:	Manila / Pearl Stone / White micro marble
Hearth:	Standard Lipped / Five Sided / Bullnose
Lights:	Optional
Rebate	45mm / 75mm

Smartsense lighting available

\*Back panel available with 22" cut out for installation with the Chollerton fires.

54" Viena surround in Manila micro marble with Smartsense lights featuring an Evolution Desire inset electric stove (page 78)

# Viena

---

## Surround

With soft curves and an unassuming arch the Viena provides a calming presence. This surround will find itself easily at home amongst any interior. The addition of Smartsense under mantel lighting adds another dimension to this surrounds universal appeal.

Models:	48" or 54"* Surround
Finish:	Manila / White micro marble
Hearth:	Standard Lipped
Lights:	Optional
Rebate	45mm / 75mm

Available in White micro marble

\*Back panel available with 22" cut out for installation with the Chollerton fires.

# Aurelia

---

## Surround

There's something sublime about the Tudor Arch that's right for any era or room style. But what gives the Aurelia the extra magic is the way its edges have a soft inward curve - beautifully offset by the Smartsense under mantel lighting.

The fluted detail of the Aurelia profile embodies the innovation of Elgin & Hall and creates an enchanting finish. Adding a five sided hearth provides the final flourish to this design.

Models:	48" or 52"* Surround
Finish:	Manila & Grey micro marble
Hearth:	Standard Lipped / Five Sided / Bullnose
Lights:	Optional
Rebate	45mm / 75mm

\*Back panel available with 22" cut out for installation with the Chollerton fires.

52" Aurelia surround in Manila micro marble with Smartsense lights featuring a Cast Stove Front gas fire (page 66)

EEC: C

# Roesia

## *Surround*

The simple geometry of this modern design is softened by curved edging under the mantel and around the inner profile of the surround.

Models:	44" or 50"* Surround
Finish:	Grey / Manila / White micro marble
Hearth:	Standard Lipped / Five Sided / Bullnose
Lights:	Optional

\*Back panel available with 22" cut out for installation with the Chollerton fires.

†Five Sided hearth available on 48"+ surrounds.

54" Vamella surround in Manila micro marble with Smartsense lights featuring a Chollerton gas fire (page 68) in Brushed Steel

EEC: C

# Vamella

## Surround

Models:	54"* Surround
Finish:	Manila / White micro marble
Hearth:	Standard Lipped
Lights:	Optional
Rebate	45mm / 75mm

For anyone with an eye for detail, this micro marble design will repay your admiring gaze for as long as it continues to grace your home.

The profiling takes two steps inwards, then back out again to frame your choice of gas or electric fire and give an impression of depth. The harmonious design is completed with the bullnose shelf and standard lipped hearth.

Available as a gas fireplace (page 36)

\*Back panel available with 22" cut out for installation with the Chollerton fires.

EEC: C

50" Sophia surround in Manila micro marble with Smartsense lights featuring a Devotion gas fire (page 64) in Nickel

# Sophia

## Surround

A gorgeous ripple effect adds to the feminine charm of the Sophia micro marble surround. Finish this beautiful surround with any inset gas or electric fire of your choosing.

Models:	46" or 50"* Surround
Finish:	Manila / Pearl Stone / White micro marble
Hearth:	Standard Lipped / Five Sided / Bullnose
Lights:	Optional
Rebate	45mm / 75mm

\*Back panel available with 22" cut out for installation with the Chollerton fires.

# An introduction to Limestone Surrounds

To create a graceful Limestone centre piece, the quarried stone is expertly selected, cut, carved and smoothed to give your room a splendid feature.

Limestone has been sought after down the ages due to its adaptability. It naturally looks right with everything. Whether you tend towards the traditional, veer to the modern or are content to be eclectic, there's a fireplace in the Collection that suits your style.

Our Limestone surrounds are manufactured from natural stone resulting in natural variation; this can include shading, veining, crystal markings and fossils. Therefore the Limestone surround you purchase may differ slightly from that shown in this brochure and have its own unique markings. This is the beauty of a natural stone product.

## Caring for Limestone

To preserve the beauty and prolong its life, your fireplace needs regular cleaning. Due to it's natural properties, Limestone needs special care and attention.

This material can stain easily and is sensitive to acids such as citrus juice, vinegar and household cleaning chemicals.

Follow a periodic cleaning routine with a mild, neutral cleaner

- Avoid using chemical cleaners as these may damage or dull the surface
- Avoid using wax or spray polishes
- Avoid placing hot objects, drinks etc directly onto the fireplace
- Simply clean with warm water

## Contents

23	Aurelia	25	Elissa
24	Vitalia	26-27	Colwyn

The Tudor Arch of this Limestone fireplace effortlessly creates an ambience which defines the Aurelia's traditional style.

There's something special about this shape that's right for any era, any room, any style.

Your whole room will gain a soft illumination from the integrated Smartsense lighting.

# Aurelia

## *Limestone Surround*

Models:	48" Surround
Hearth:	Standard Lipped
Lights:	As standard
Rebate	75mm

48" Aurelia Limestone surround with Smartsense lights featuring a Devotion gas fire (page 64) in Nickel

The Vitalia's foursquare boldness is offset by the fine detailing of the inward-stepping framework which draws the eye gently to the fire within.

The broader proportions of this surround give you the freedom to opt for the greater impact of a wide screen format gas fire, which the Vitalia is comfortably able to accommodate.

# Vitalia

## Limestone Surround

Models:	52"* Surround
Hearth:	Standard Lipped
Lights:	As standard
Rebate	75mm

\*Back panel adjusts to 22" cut out for installation with the Chollerton fires.

EEC: C

# Elissa

## *Limestone Surround*

Models:	50" Surround
Hearth:	Standard Lipped
Lights:	As standard
Rebate	75mm

An essentially simple design gains a certain curvaceous appeal thanks to the delicately arching frame which turns inwards on all three sides to a full 90 degrees.

The variegated texture of Limestone allows for the Elissa to look as though it was made for the style in which you furnish your space, classic or contemporary.

Beautiful soft curving detail

54" Colwyn Limestone surround with Smartsense lights featuring a Cast Stove Front gas fire (page 66)

EEC: C

# Colwyn

## *Limestone*

### *Inglenook & Surround*

This is more than a fireplace, it's a piece of great domestic architecture – classic stoic base, Tudor Arch, intricately carved profiles and mantel shelf. The Colwyn makes a handsome companion for a gas or electric fire, and really comes into its own with an inglenook opening.

Limestone is ideal for multifuel stoves because it has the special property of absorbing maximum heat output and holding it like a radiator for your greater comfort.

Models:	54" Surround or Inglenook
Hearth:	Bevelled
Lights:	As standard
Rebate	25mm

EEC: A+

Available as an inglenook shown here with the Evolution 5 multifuel stove

An introduction to

# Gas Fireplaces

## Pre-Cast & Standard flue solutions

Thanks to innovative design, we have engineered a way to fit our new highly desirable gas fires into the standard 16x22" opening in a UK chimney breast or pre-cast flue, with no need for any building work.

And we've created magnificent micro marble fireplaces to fit.

Whichever you prefer, the installation is all the more simple because all the fireplaces are made as a complete single unit. It has taken years of research to develop and perfect this innovative technology which puts Elgin & Hall a step ahead of the market.

### Finishes

Please note: colour options will vary for each surround.

### Control

Easy slide ignition and operation.

### Standard Flue

A traditional chimney can be identified by the brick stack and pot on your roof and a chimney breast in your room. Your installer will be able to simply place these fireplaces into the existing opening and your chimney does the rest. No building work required!

### Pre-Fabricated Flue

Identifiable by a metal flue and terminal on the roof, this flue system is suitable for all our gas fires. Piping from your flue right down to your fire transports the gasses from the fire and out of the house. Again this flue is suitable for installation with any of our gas fires.

### Pre-cast Flue

Many homes built from 1960 onwards have a pre-cast flue, much narrower than a traditional chimney and is usually identified by a ridge vent or a metal flue pipe on the roof. Ordinarily only slimline fires would fit this flue, however we have a large selection of gas fireplaces to choose from with no structural work needed.

52" Embleton gas fireplace in White micro marble

### *Made to fit into any pre-cast & standard flue*

The craftsmanship devoted to Elgin & Hall micro marble surrounds is celebrated in the form of the Embleton. Every element of this stunning structure, from the soft curve of the mantel top to the angular stepped detailing of the surround, is a delight to behold. Choose from White or Manila micro marble finish or opt for a Grey micro marble inlay for a contemporary twist to a classic model.

Fast to install by fitting directly into a pre-cast opening, this transformation can be completed in record time, with no unsightly building work. Enjoy and admire the integrated Elsie 900 widescreen glass fronted fire, delivering a realistic glowing log bed and flame performance like no other. Providing 5.1kW of glorious heat with an impressive 83% efficiency, the Embleton complete gas fireplace cannot fail to impress.

52" Wayland gas fireplace in Manila micro marble

EEC: D

# Wayland

## *Gas Fireplace*

Models:	52" Fireplace
Finish	Manila or White micro marble
Hearth:	Standard Lipped
Flue:	Standard / Pre-Fabricated / Pre-Cast

For the ultimate flame performance the Wayland gas fireplace is a strong contender.

It's the wide expanse of fuel bed which allows you to fully appreciate the realistic glowing log bed and flame effect with hypnotic qualities, which have to be seen to be believed. Encased within a luxurious micro marble structure, this fireplace has the ability to demand visual attention and adoration. Featuring bold stepped detailing and a standard lipped hearth, you simply won't be able to imagine your home without it.

Double Step design

# Vamella

## *Gas Fireplace*

Models:	52" Fireplace
Finish:	Manila / White micro marble
Hearth:	Standard Lipped
Flue:	Standard / Pre-Fabricated / Pre-Cast

Behold the delight of a single, integrated fireplace with advanced gas technology, that's the marvel of the Vamella.

The innovative design of the exquisite micro marble encases the glass-fronted fire to create a true partnership of timeless beauty. Taking in every inch of the vast space, the flames will draw your gaze in to appreciate the glorious warmth of the fire.

Easy to fit, ignite and operate, the Vamella will satisfy your desire for a visionary masterpiece.

48" Orieta gas fireplace in White micro marble

EEC: D

# Orieta

## *Gas Fireplace*

Models:	48" Fireplace
Finish:	Manila / White micro marble
Hearth:	Bevelled Deep
Flue:	Pre-Cast

The Orieta pairs timeless marble with advanced gas technology. Fire and surround together compose a single, integrated unit, making it easy to fit and satisfying to behold.

The glass-fronted fire delights with large dancing flames, by completely filling the space framed by the surround - taller so the flames can climb further, broader so the log bed can stretch the glow.

But here's the subtle difference. The inner frame of the beautiful micro marble surround curves fractionally outwards, creating enough space behind it to accommodate the fire's concealed working components.

Orieta detail in Manila micro marble

# An introduction to Electric Fireplaces

## Beauty of electric

Our electric fireplaces offer ultimate convenience - they can be installed against any flat wall in any room.

With a style as beautifully different as the decor and furniture which you seek to match - there is a fireplace as individual as you are.

The 2kW performance provides instant heat when you arrive home, supplements central heating or allows you to heat just one room when the weather is on the cool side.

## Flame effect

The flame-effect-only setting gives the impression of radiant logs and flickering flames with a choice of three levels without the added heat; perfect for warmer nights.

The latest LED technology produces a play of red, orange and yellow tones with hints of blue that is both realistic and cost-effective.

## Easy installation

This amazing transformation can be fitted in half a day at the most. Because it's electric no chimney or recess is required. Then it's just a question of simply plugging it in... and let the magic begin.

## Finishes

Our range of electric fireplaces gives you a choice of micro marble, natural timber veneer or soft-toned painted finishes.

50" Amorina Novus electric fireplace in White micro marble featuring a widescreen electric fire with Black Nickel trim

# Amorina Novus

## *Electric Fireplace*

Traditional in style, the Amorina Novus is a popular favourite. Sharing the Amorina family features, this stunning centre piece boasts a contemporary flourish delivered in the form of the integrated Novus LED electric fire. Available in lustrous Black Nickel or Chrome trim, it will demand your visual attention. The realistic log bed glows with outstanding realism accompanied by enchanting flickering flames which dance before you. You simply won't be able to imagine your home without it.

# *An introduction to* **Inset Gas** *Fires*

Once you've selected your new stunning fireplace, you may choose to give it a warm glowing heart with an Elgin & Hall gas fire.

Our gas fires are controllable and convenient to operate with a discreet Smartslide control mounted on the top side or a manual control and igniter located behind the fret - flame height and heat output is at your control.

## *Warranty*

We provide a 5 year Warranty\* so you can be confident you have purchased and installed a high quality product.

\*Terms & conditions apply.

## *Contents*

64	Exclusive	67	Eclipsim Cast Fascia
64	Devotion	68	22" Chollerton
65	Classic Collection	69	22" Chollerton Cast Stove Front
66	16" Cast Stove Front		

## *Safety Assurance*

### *Flame Failure Device*

All of our gas fires are fitted with a flame monitoring device ensuring that in the event of the flame going out during its operation, the gas supply to the fire is instantly cut off.

### *Oxygen Depletion Sensor*

For your safety, all our gas fires are fitted with an Oxygen Depletion Sensor. This will shut off the gas supply if the oxygen level in the room is too low or if there is a blockage in the chimney or flue.

### *Quality Approved*

All Elgin & Hall fires are manufactured in accordance with internationally recognised Quality and Environmental Management System Standards ISO 9001-2015 and ISO 14001-2015 guaranteeing responsible working and product quality.

## Installation

Current regulations stipulate that all gas fire installations must be carried out by a Registered Gas Safe Engineer.

For information and advice on a Gas Safe Engineer, please contact your local Elgin & Hall retailer.

## Servicing

We recommend that all gas fires are serviced annually by a Registered Gas Safe Engineer to ensure continued operation and optimum performance.

This annual service is a condition of our 5 year warranty, and you must be able to show a record of approved servicing to be able to make a claim.

## Super Controllable

### Smartslide Control

The discreet Smartslide control mounted at the top right hand side makes your Elgin & Hall gas fire convenient to operate. To turn the fire on simply press down and release.

Likewise you can turn the fire off by lifting to its top position. The control's second function is to regulate the flame height and heat output.

Smartslide controls give you the freedom to change the fire picture from smouldering to blazing at a touch to suit your mood and desired room temperature.

### Manual Control

All our open fronted gas fires are available as manual control.

Neatly concealed behind the fret, these controls allow you to regulate your heat output and flame setting before replacing the fret for a sleek finish.

## Accessories

### Xtra Canopy

The Xtra canopy kit\* "tunes" the appliance to your flue to raise the efficiency by up to 8% on an open fronted fire.

\*Available on Slimline or Deepline Radiant models only

### Spacer Kit

The spacer kit fits to the rear of the fire to reduce the depth by 25mm. It is ideal for use with pre-cast flues.

### Handle Options

An easy grip\* attachment allows those with restricted movement to control the ignition & heat.

Matching colour handles are available in Brass & Chrome. A Black Smartslide handle is supplied as standard with Smartslide models.

\*Easy grip handle not suitable for Chollerton gas fire.

The various types of flue and chimney require different size specifications of gas fire.

Whichever kind your home has, there is an Elgin & Hall gas fire to fit.

Gaze over the next few pages and you will easily identify which one is suitable by following the 3 simple steps.

## Step 1: Consider the fit

All of our gas fires require a chimney or flue to conduct expended gases to the exterior. To identify which type your house has and which model of fire will fit (slimline, mid-depth or deepline), check the simple descriptions below.

### *Brick Chimney Flues* *Class 1*

Easily recognisable from the stack above the roof line (usually with a pot or gas terminal). Once the fire is sealed into the chimney cavity, any harmful gases are expelled up the chimney itself and out of the roof. Any of our gas fires can be installed here.

### *Pre-Fabricated Flues* *Class 2*

Identifiable by a metal flue and terminal on the roof, this flue system is suitable for all our gas fires. Piping from your flue right down to your fire transports the gasses from the fire and out of the house. Again this flue is suitable for installation with any of our gas fires.

### *Pre-Cast Flues*

Recognisable by a ridge vent on the roof line, and built from concrete or clay blocks, usually within the wall cavity, the expelled gasses are vented through this shallow passage and out of the roof. Pre-cast flues are perfect for our Slimline or Deepline \* Radiant gas fires.

\* Deepline Radiant fire suitable when installed with a 75mm rebated surround.

### *Balanced Flue*

Identified by a round flue installed directly through an external wall. Our balanced flue fire is completely sealed from the front, allowing air to circulate through the flue to the rear of the fire. Cold air is sucked into the fire to combust and the gasses are expelled via the same point. This fire is highly efficient due to its airtight installation and can be installed without a chimney breast.

## Step 2: Choosing the right engine

### Open Fronted

#### *Slimline Radiant*

Radiant gas fires pull in cold air through their open front, circulating it over the real flames and emitting it back into the room.

Install In:	Pre-Cast, Pre-Fab or Brick Chimney				
Efficiency:	52% (58% with Xtra canopy)				
Control:	Smartslide or Manual				
EEC	F				
		High	Canopy	Low	Canopy
Heat Input:	Manual	6.75kW		3.5kW	
	Smartslide			3kW	
Heat Output:	Manual	3.2kW	3.5kW	1.5kW	1.7kW
	Smartslide			1.3kW	1.4kW

#### *Deepline Radiant*

Install In:	Pre-Cast*, Pre-Fab or Brick Chimney								
Efficiency:	52% (55% with Xtra canopy)								
Control:	Smartslide or Manual								
EEC	F								
		High		Canopy		Low		Canopy	
Heat Input:	Manual Smartslide	6.75kW				3.5kW			
						3kW			
Heat Output:	Manual Smartslide	3.2kW		3.4kW		1.5kW		1.6kW	
						1.3kW		1.4kW	

#### *Deepline Convector*

Hot air is transferred through the canopy to circulate the warmth around your room.

Install In:	Pre-Fab or Brick Chimney			
Efficiency:	62%			
Control:	Smartslide or Manual			
EEC	F			
Heat Input:	Manual Smartslide	High		Low
		6.75kW		3.5kW
Heat Output:	Manual Smartslide	3.8kW		1.8kW
				1.6kW

### Glass Fronted

#### *Mid-Depth*

A panel of ceramic glass prevents air from being sucked up through the front of the fire and directing heat up the chimney, meaning a higher percentage of convected and radiant heat is propelled back into the room.

Install In:	Pre-Cast, Pre-Fab or Brick Chimney	
Efficiency:	82%	
Control:	Smartslide	
EEC	D	
Heat Input:	High 3.7kW	Low 2.5kW
Heat Output:	High 2.7kW	Low 1.7kW

#### *Deepline*

Install In:	Pre-Fab or Brick Chimney	
Efficiency:	87%	
Control:	Smartslide	
EEC	C	
Heat Input:	High 5.3kW	Low 2.7kW
Heat Output:	High 4.2kW	Low 2kW

#### *Chollerton Widescreen*

Install In:	Pre-Fab or Brick Chimney	
Efficiency:	86%	
Control:	Smartslide	
EEC	C	
Heat Input:	High 5.3kW	Low 2.7kW
Heat Output:	High 4.3kW	Low 1.8kW

### Balanced Flue Glass Fronted

This glass fronted balanced flue gas fire is pleasingly traditional with a welcome efficiency of 86% and a cosy 3.3kW heat output.

Install In:		Balanced Flue	
Efficiency:		86%	
Control:		Smartslide or Manual	
EEC		C	
		High	Low
Heat Input:	Manual	4.2kW	2.9kW
	Smartslide		2.7kW
Heat Output:	Manual	3.3kW	2.1kW
	Smartslide		2kW

\* When installed with a 75mm rebate surround

# 16" Inset Gas fires

Our range of gas fires are available with an extensive choice of trims and frets to suit your style. Simply select your preferred collection, then choose your finish.

Fire Engine	(C) Inset Depth	Minimum Aperture in Chimney	Open or Glass Fronted	Xtra Canopy
Slimline Radiant	123mm	w405mm x h555mm	Open Fronted	<input checked="" type="checkbox"/>
Deepline Radiant	173mm			<input checked="" type="checkbox"/>
Deepline Convector	198mm			<input checked="" type="checkbox"/>

Deepline H.E	198mm			<input checked="" type="checkbox"/>
Balanced Flue	186mm	N/A		<input checked="" type="checkbox"/>

## Exclusive Fascia Collection

The framework of the Exclusive trim has a flat face with a long bevelled edge that slopes down towards the fire. The trim is broad and slightly accented in profile to complement the four boldly curving bands of the fret.

In Brushed Steel, Brass, Chrome or Black, the harmony of the trim and fret creates a non-fussy but sympathetic note to a stylish interior.

Available finishes:

Chrome

Brushed Steel

Brass

Black

## Devotion Fascia Collection

The distinguishing feature of this range of designs is the Black finished framework bordering either side of the metal trim. This serves to provide a dramatic contrast which accentuates the Chrome, Brass, Nickel or Brushed Steel finish. The fret itself curves slightly outwards to add extra interest.

Available finishes:

Chrome

Brushed Steel

Brass

Black Nickel

# Inset Electric

---

## *Fires & Stoves*

Whichever Elgin & Hall micro marble surround you choose, the centre of attraction is the fire itself, inset into the back panel.

Whether you are replacing a gas or coal fire or installing a natural focus to a room with no existing fireplace, going electric allows you to connect with clean, instant, efficient and thermostatically controlled heat.

*Benefits*

With an electric fire you don't need to generate heat to enjoy its comforting glow. The LED flame effect only control option, lets you experience it any time of the day or year.

*Efficient*

Enjoy the convenience of efficient, instantly controllable heat and clean maintenance-free living. By itself the LED only effect consumes just 6 watts of energy. Brilliant!

*Remote Control*

An Elgin & Hall inset fire should be effortless to operate. Which is why they come complete with a remote control to put different levels of heat, light and flame at your fingertips.

## Take the next step

### Find your local retailer

Once you have chosen your favourite surround, picked the finest fire and measured up to ensure it will fit, it's time to visit your local showroom.

Admiring these British designed and manufactured fireplaces first hand is the best way to understand their quality and craftsmanship. Why not take paint charts, fabric samples or photos of your room to match with the surrounds.

If you need advice, you can trust the experience of our independent retailers.

To find your local retailer visit our website or call us.
