# Discover Valor

At Valor we are always striving to improve the products we offer you. This may be technical changes that improve how the products work with your lifestyle, through to totally new designs. For example, following the successful launch of the Inspire 400 range, we added a remote-control option.

Our aim is to provide the widest selection of products so you can find a design that fits your home and your budget.

New to this brochure is a range of contemporary gas stoves – the Inspire 400 L and M. These stylish products come as a one box solution and offer a freestanding alternative, but have many of the unique features available on the wider Inspire range.

Choose from the tall L model with built in log store, or the more traditionally sized M – ideal for freestanding or fitting into a fireplace. See pages 6-9 for more information.

# Chimney Options

The Inspire range is only suitable for brick chimneys.

**Brick Chimney (BC)**  
The classic brick built chimney is suitable for all gas fires.

**Pre-fabricated Flue (PF)**  
Pre-fabricated chimneys are suitable for most gas fires dependent on flue depth and diameter.

**Pre-cast Flue (PCF)**  
Pre-cast flues are found in most modern homes and are suitable for slimline gas fires.

**No Chimney (NC)**  
No chimney or flue? Balanced flue gas fires are suitable in this case.

# Discover Valor

**Discover Inspire - a stunning collection of landscape gas fires and stoves from Valor.** Inspire brings a sense of style, quality and prestige to your living space. Combining design inspiration with innovative performance features and easy servicing, Inspire is the perfect fire for your home.

**Design versatility**  
Create your perfect fire by choosing from a long list of design options with the Inspire Collection. Depending on the model, you can choose from different trims, liners, glass frame colours, glass and fuel beds.  
  
The 400, 500, 600 & 800 models also come with a choice of two suites for each model. Inspire fires (excluding 400 model) can even be purchased with a frameless kit which requires no trim.

The options available will vary according to model, so please see individual product pages for details

**State-of-the-art control options**  
All models in the Inspire Collection come with a choice of Fireslide or remote control. Valor's unique Fireslide control lets you easily adjust the flames output with a simple control. For the ultimate in convenience, there is also the option of an advanced remote control (see page 38 for more details).

**Flexible flame picture for improved efficiency**  
With Valor's unique Dual burner, available on the 600, 800 & 1000 models, you also have greater control over your heat output, being able to reduce it down to 34% when the full flame is not required (typically a conventional burner can be turned down to 60% of output), giving you maximum comfort and complete control.

**Flexible installation**  
For added flexibility of installation, a gather hood connector kit, designed exclusively for all Inspire fires (excluding stoves), allows the fire to connect to a flexible flue system. Even servicing is made easy, thanks to the way in which the entire burner assembly slides out.

**Highest standards guaranteed**  
All Valor fires are designed, manufactured and tested to the highest standards, to ensure the quality and safety of the products we sell. As part of the multi-national Glen Dimplex Heating & Ventilation division, our products are developed in state-of-the-art research and design facilities, incorporating the very latest in home heating technologies. As a result, you can have confidence that you are buying from a leading brand that you can trust – backed by more than 60 years of proud history.

**High efficiency**  
Our dedicated research and development facilities combine the latest technology with innovative techniques to ensure our products offer the highest possible efficiency. For example, all fires in the Inspire range are glass fronted so this helps you to consume less energy and keep running costs to a minimum.

**Best of both worlds**  
Gas fires deliver two types of heat – radiant and convected. Radiant heat warms people and not the air, offering instantaneous localised heat. Convected heat works by pulling cold air through the bottom of the fire and passing it over the flames pushing hot air into the room. This means that a gas fire can offer you the best of both worlds – the cosy instant warmth of an open fire as well as generally heating the room.

# Trusted retailer network

Our aim is to make owning a Valor fire a truly enjoyable experience – from initial search through to installation, followed by years of pleasure from your purchase.

As well as ensuring you have all the information you need – after all buying a fire for your home is a major decision – we also want to make sure our fires and sold and installed correctly.

**National network of expert retailers**  
Inspire fires are only sold through a network of Valor Centre retailers who provide the highest levels of service, knowledge and experience. These retailers are experts in their field and will talk you through your individual requirements – both technical and aesthetics – to help guide you to your perfect Valor fire. They will be able to show you a range of products in their showroom – many will be fully operational – so that you touch, try and see the quality of the product for yourself.  
Once installed, these retailers will also be able to provide any after sales service you require, including annual maintenance.  
This means you can relax in the knowledge that your fire has been recommended, supplied and installed by professionals to the highest standards.  
**Visit [www.valor.co.uk/find-a-retailer](http://www.valor.co.uk/find-a-retailer)** to find your nearest Valor Centre showroom, to see our fires in action and discuss your individual requirements.

**Extra warranty**  
When you purchase a Valor Inspire fire you do so with the utmost confidence that it will serve you for many years to come. Such is the confidence in our products, that when you purchase an Inspire fire from a Valor Centre retailer, you are eligible for an exclusively extended three year warranty (one year as standard, plus an additional two years upon online registration at [www.valor.co.uk](http://www.valor.co.uk)) on all Valor Inspire products.  
To take advantage of this, simply complete the online registration at **[www.valor.co.uk/warranty](http://www.valor.co.uk/warranty)**. Products must be installed in accordance with the manufacturer's instructions and maintained in line with the Terms & Conditions, which includes an annual service.  
For full terms and conditions visit **[www.valor.co.uk/terms-and-conditions](http://www.valor.co.uk/terms-and-conditions)**.

Inspire 400 Fireslide Luminaire Medium Stove with black glass frame and vermiculite liner

# Inspire 400 Medium Stove

## Product features and benefits

# Design Versatility - Your Choices

## Trim Options

Edge Trims

Grande Trims

Frameless Kit

Note:

Inspire 400 models comes with a choice of a 3-sided or 4-sided trim available in the above designs and colour finishes. Inspire 400 stoves do not require a trim, as they come complete with stove casing.

Note:

Frameless kit available on 500, 600, 800 and 1000

## Liner Options

Black Liner

Vermiculite Liner

Mirrored Glass Liner

Slate Liner

Brick Liner

Note:

All Inspire 400 models & stoves are only available with a choice of black, mirrored glass & vermiculite liners

## Glass Options

Choose from standard or Clear Vision anti-reflective glass. Anti-reflective glass offers crystal clear transparency. It reduces reflections to just a fraction of those seen with conventional glass.

Standard

Clear Vision anti-reflective

## Glass Frame Options

Choose from black or anthracite glass frames.

Black

Anthracite

# Burners Explained

## Luminaire LED Burner (Inspire 400, Stove L and Stove M)

The Luminaire LED technology provides an electric underbed glow, creating the illusion of burning embers for a warming glow that can be enjoyed with or without heat. It also features advanced burner technology which provides an unbeatable ‘camp-fire’ flame picture (see pictures).

Setting 1 – Low

Setting 2 – Medium

Setting 3 – High

Luminaire – under-bed glow

## Single Burner (500 models only)

The Inspire 500 models are fitted with an advanced burner, which offers a realistic flame picture and glow.

Setting 1 – Low

Setting 2 – Medium

Setting 3 – High

## Dual Burner (600, 800 & 1000 models only)

The Inspire ‘Dual’ burner is divided into three sections which allows the front burner to be lit on low (setting 1) or on medium (setting 2) and also enables both burners to be on full (setting 3).

Setting 1 – Low

Setting 2 – Medium

Setting 3 – High

## Fireslide

A first of its kind for premium gas fires, Fireslide lets you easily adjust the flame output with a simple slide control. All Fireslide models come with both chrome and black handle as standard.

Fireslide control – Inspire 400, Stove L & Stove M

Fireslide control – Inspire 500, 600, 800 & 1000

## Control Options

### Remote

This premium control offers a host of features including on/off, flame settings & output control and a host of operation modes including thermostatic, eco and programme modes, and child proof mode for extra piece of mind.

Inspire 400 including stoves

Inspire 500, 600, 800 and 1000

# Surround Dimensions

## Surrounds Care

The surrounds featured in this brochure are made from beautiful materials naturally formed over millions of years, they have very individual features and characteristics encapsulated within them. From inside the raging furnaces of a cooling world there are the close up flowing swirls and veins of the molten rocks and from the crashing shores of oceans long ago, there are the shells and fossils nestled among the silt and shingle of ebbing tides.

Your fireplace should be protected from staining. In the event of an accident soak up any spillage immediately. Where staining has occurred, use a specialist stone cleaning and resealing kit, following the instructions given by Valor. Before cleaning, turn off the fire and allow to cool beforehand. Dust down regularly with a soft clean brush and occasionally wipe over with a damp cloth.

Inspire 400 Atalanta Suite

Note: The Inspire 400 gas fire can only be hearth mounted with the Atalanta suite

**Important Notice:** All dimensions stated within the specification table are intended as guidance only. Please consult installation instructions before commencing any building work. The right to change specification without prior notice is reserved. No liability is accepted for problems caused by poor installation or misuse of product. \* These are Inspire Stove appliance dimensions allowing for clearances into a non combustable fireplace opening.

Gather Hood Connector Kits

For added flexibility of installation, all models (excluding stoves), come with the option of a gather hood connector kit, designed exclusively for the Inspire collection, which allows the fire to connect to a flexible flue system.

Product Code	Description
061621	Gather Hood Connector Kit - 500
061638	Gather Hood Connector Kit – 400 & 600
061645	Gather Hood Connector Kit – 800 & 1000

Terms & Conditions

Valor’s policy is one of continual improvement and development. The right to change specification without prior notice is reserved, therefore the actual product may change and so the image shown may not be an exact representation. All images within the brochure were correct at the time of print. Reproduction of colours is as accurate as the photographic processes will allow.

Though accurate at the time of printing, this brochure is not intended to replace the installation manual which provides more detailed information. The statutory rights of the consumer are not affected. No liability will be accepted for problems caused by poor installation or misuse of the product.

All our products carry the CE Mark complying with European safety standards.

Our products are made in accordance with Quality Management System Standard ISO 9001.
